

# Vegetable Garden Planner

## **My Garden Features**

- My garden gets \_\_\_\_\_ hours of direct sun daily; it is (circle one) Full Sun | Part-Sun | Shady.
- My soil is mostly (circle one) Sandy | Loamy | Clay.

## **Growing Plan**

Use information from your seed packet or transplant label to fill in the table below.

Vegetable	Seeds or Transplant	Plant Spacing	Row Spacing	No. of Plants	Days to Harvest	Planting Date	Harvest Date

### **Cool Season Crops**

- Plant from seed ~ late April OR when soil temp is 50-60°
- Beets\*, broccoli, Brussels sprouts, cabbage, carrots, cauliflower, herbs (cilantro\*, mint\*, parsley\*), kale, leeks, lettuce\*, peas\*, onions, parsnips, radish\*, rutabaga, scallions, spinach\*, turnips

### **Tender Crops**

- Plant from seed ~ late May/early June OR when soil temp is 60-65°
- Beans\*, collards, corn, melons (cantaloupe, honeydew, watermelon), potato\*, summer squash (cucumbers, patty-pan, straight-neck, zucchini), swiss chard, winter squash (acorn, butternut, pumpkin, spaghetti)

### **Warm Season Crops**

- Transplant seedlings ~ late May/early June OR when soil temp is 60-65°
- Celery, eggplant, herbs (*basil, dill, oregano, rosemary, sage, thyme*), peppers (*bell, hot, sweet*), tomatoes

\* Part-sun tolerant

**Garden Design Plan**

Use the grid below to draw the outline of your garden and arrange your vegetables. Reference your Growing Plan for spacing. Make notes about where additional supports, like trellises, will be needed.
